

Using Google API

When you use the `GDriveUploader` class you will be prompted to use a gmail account. Use the following account:

Email: youthgtp5.gdrive@gmail.com
Password: ToBeHappy@UniIn2024

After, hit the continue button twice.

Now, if you log into the google drive for the above google account, you will see the translated files. Tokens last for 1 hours before refreshing them is required (you will need to sign in again after every hour).
